

Make your etching process easier: position stencils, stamps and workpieces with precision to achieve constant marking results!

Art. No.: 56.072

Workholding Unit L1

- * For small series
- * Compatible with all Signomats
- * Manual movement of the stamp
- * Manual supply of Electrolyte
- * To be used as a "third hand"

Art. No.: 56.073

Etch-Station M1

- * For small and mid-size series
- * Compatible with all Signomats
- * Automatic supply of Electrolyte
- * Manual forward pump function of Electrolyte possible
- * Opening angle 60°
- * Height adjustment up to 160mm
- * Rotation 360°

Art. No.: 56.075

Pneumatic Attachment

- * For medium and mass production
- * Compatible with Signomat S100
- * Expandable to semi or fully automatic operation
- * Constant pressure force
- * Operable with foot-switch
- * Adjustable movement range in Z-axis up to 370mm
- * Optional: Electrolyte Pump for an automatic, constant supply of Electrolyte

Art. No.: 35.005

Electrolyte Pump

- * Optional for the Pneumatic Attachment
- * Fine dosage of Electrolyte
- * Always the same results due to a constant supply of Electrolyte
- * Automatic pump function of Electrolyte liquid - forwards / backwards

All Work Holders allow for fine adjustment of the stencils and easily exchangeable jigs. Simply simple.
